-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to because in Figure 1, there are two occurrence of reference number "30" and one of them lacks a lead line to connect it to a structural element. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3644

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shaw (4,944,057). Shaw shows a device capable of being used to harness a child comprising a carrying pouch (18) which comprises a generally flexible piece of material that has side edges (24,26) which define at least a part of a respective leg opening (straps (14,16) also define the opening) in the lower part of the pouch, wherein said piece of material includes a length of strong, flexible material, such as nylon webbing, is passed through the pockets formed by portions (32,34,44,46), and the ends are overlapped and attached to form a continuous loop; and wherein portions (32, 34,36,44,46,48) are formed in a double layer of the material, outwardly of seam (42,54) where the material has been stitched to itself after the marginal edge portion has been folded inwardly, upon itself, such that the seam is placed on one major surface of the material in the region of a leg opening. The seam of Shaw appears (Figures 4 and 5) to be at least at a distance of at least 0.5 cm or 1 cm from the edge of said leg opening; however, the distance from the edge is not specifically disclosed. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide that the distance between the edge and the seam be the distances claimed to provide pockets capable of accommodating straps of varying or larger widths.

***Allowable Subject Matter***

4. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
